

**ABSTRACT OF THE DISCLOSURE**

1  
2 A bag includes a back wall having a hook accommodating the hanging of the bag when  
3 opened, a plurality of compartments on a front surface of the back wall, the plurality of  
4 compartments having a front portion being of a mesh material accommodating a view of the objects  
5 and a circulation of air within the compartments. The compartments can have shelves projecting  
6 from the back wall to accommodate the objects. The wall can be folded or rolled to close the back  
7 wall into the bag for carrying by the handles through hands or on a back of a user. A locking bar on  
8 a zipper enclosing the bag can be used to secure the bag to a locker.
